

ENDO FREEZE

REFRIGERANT SPRAY

Spearmint Scented Endo Freeze™ is a quick acting spray specially formulated for testing pulpal vitality. The low liquid temperature of -15.7°F (-26.2°C) insures immediate results from vital teeth.

Safe for use in any environment, Endo Freeze™ is non-flammable and non-explosive. Ease of use and convenient handling makes it safe for dental procedures. Ideal for on-the-spot pulp testing.

Select Dental MFG Endo Freeze™ contains zero CFC and is environmentally safe for the Ozone.
