

POLAR BLAST

FREEZE SPRAY

For use as a freeze spray for the testing of pulp vitality.
Eliminates the use of messy ice cubes by applying a small amount to a cotton pellet.

Works great with thermoforming.

Helps to assure maximum adaptation of trays, mouthguard materials, retainers and other plastics by stopping all thermal action.

Increase flexibility on thermally activated arch wires.

Works great with heat activated wires by making wires more pliable.

10oz cans contain 4oz more than most other name brand freeze sprays.
